Summary

Results-driven Software Developer with 2+ years of experience delivering high-performance, scalable backend systems using **C#, .NET 8, ASP.NET Core, gRPC, GraphQL**, and actor-based architectures. Proven expertise in building real-time device monitoring platforms, multi-threaded microservices, Blazor dashboards, and high-throughput **REST/GraphQL APIs**. Strong command of **Dapper, Entity Framework Core**, clean architecture, **SOLID principles**, and performance optimization. Additional hands-on experience with **Node.js/TypeScript** microservices and **Go** for data pipelines.

Experience

Sarvaha Systems Pvt. Ltd July 2024 – Present
Software Developer | C#, .NET Core, ASP.NET Core, Blazor, gRPC, GraphQL, Dapper, EF Core, MS SQL, NUnit Pune, India

- Designed and developed a high-performance **Device Control and Monitoring System** using **C#, .NET Core** for real-time device communication and simulation.
- Developed **multi-threaded device plugins** using **async/await**, concurrency patterns, and **plugin architecture**.
- Implemented **actor-based communication over gRPC** for scalable **distributed systems**.
- Built **GraphQL and REST APIs** using **ASP.NET Core**.
- Developed **real-time dashboards** using **Blazor Server**.
- Implemented high-performance data access using **Dapper** and **Entity Framework Core** with **MS SQL Server**.
- Delivered **NUnit unit tests** (80%+ coverage), applied **SOLID principles** and clean architecture, and contributed to system design and performance optimization.

Sarvaha Systems Pvt. Ltd Jan 2024 – June 2024
Software Engineer Intern | Node.js, TypeScript, MongoDB, SQL, GCP BigQuery Pune, India

- Developed a **Node.js + TypeScript microservice** for master data management and built automated scheduler pipelines for distributed data synchronization.
- Optimized **MongoDB queries and indexing**, reducing API latency by **40%** and improving query performance.
- Designed and implemented **SQL data pipelines** for large-scale data processing, normalization, and data-quality validation.

Projects

MDM Service | Master Data Platform | *Node.js, TypeScript, MongoDB, PostgreSQL* July 2024 – Present

- Developed scalable **REST APIs** to manage and synchronize high-volume product master data across systems.
- Optimized **MongoDB** queries using indexing and query tuning, reducing response time by **35%**.
- Built automated data transformation pipelines and integrated Slack webhook alerts for job monitoring.

Technical Skills

Languages & Scripting: C#, Go, TypeScript, JavaScript, SQL, Bash, C++
Web Frameworks: .NET Core, ASP.NET Core, Entity Framework Core, LINQ, Blazor, Node.js, Express.js
Tools & Platforms: Docker, Git, GitHub, CI/CD, Linux, Redis
Databases: MSSql server, PostgreSQL, MySQL, MongoDB, Redis, Google BigQuery
Design & Systems: SOLID Principles, Design Patterns, Microservices, Low Level Design (LLD), High Level Design (HLD)
Concepts: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management Systems

Education

Shri Guru Gobind Singhji Institute of Engineering and Technology, Nanded 2020 – 2024
B.Tech. in Information Technology CGPA: 9.21 / 10
Nanded, Maharashtra

Achievements

- Silver Medalist** for academic excellence in B.Tech.
- Winner of intercollegiate coding contests: **Code Combat** and **Coding Chaos**.
- Codeforces Specialist** with a peak rating of 1453.
- Solved 1500+ problems across **LeetCode**, **Codeforces**, and **HackerRank**.
