Experience

Sarvaha Systems Pvt. Ltd

July 2024 – Present

Software Developer – C#, .NET 8, Blazor, ASP.NET Core MVC, EF Core, LINQ, NUnit, PowerShell, SQL

Pune, India

- Designed and developed multi-threaded, protocol-driven plugins and simulators for a high-performance **Device Control and Monitoring System** using **C#** and **.NET 8**.
- Built responsive UI and real-time analytics dashboards with **Blazor Server**, **Razor Components**, and **SignalR**.
- Identified and fixed memory leaks in long-running services by analyzing heap dumps and object allocations.
- Handled data access via **Entity Framework Core (Code-First)**, complex **LINQ**, and repository pattern.
- Implemented backend services using **ASP.NET Core** with middleware and dependency injection.
- Created reusable libraries and config-driven modules to unify plugin behavior across protocols.
- Wrote **unit tests** using **NUnit**, achieving 80%+ code coverage.
- Built a cross-platform compression module in .NET, replacing 7-Zip dependency and enhancing Linux compatibility.
- Followed **SOLID principles**, applied **clean architecture**, and maintained high code quality using **SonarQube** and static analyzers.
- Participated in system design discussions, code reviews, and performance tuning sessions, ensuring scalability and maintainability.

Sarvaha Systems Pvt. Ltd

Jan 2024 – June 2024

Software Engineer Intern – Node.js, TypeScript, JavaScript, Express, MongoDB, SQL, BigQuery

Pune, India

- Developed a **Node.js + TypeScript** microservice for master data management, improving data sync performance.
- Built scheduler pipelines for automated and resilient data migration between services.
- Optimized **MongoDB** aggregations and indexing, reducing API latency by 40% under load.
- Engineered **SQL pipelines** to normalize healthcare data, cutting processing time by 25% and storage by 50%.
- Implemented automated SQL-based data quality checks for early inconsistency detection.

Projects

MDM Service – Master Data Platform | Node.js, TypeScript, MongoDB, PostgreSQL

July 2024 – Present

- Built scalable **REST APIs** to manage and sync large volumes of product master data across systems.
- Optimized **MongoDB** and **PostgreSQL** queries for faster access and reduced response time by **35%**.
- Automated data validation, transformation, and synchronization using scheduled pipelines.
- Integrated **Slack webhooks** to notify teams of pipeline completions, improving operational visibility.

Technical Skills

Languages & Scripting: C#, Go, C++, TypeScript, JavaScript, SQL, Bash

Web Frameworks: .NET Core, ASP.NET Core, Blazor, Entity Framework Core, LINQ, NUnit, Node.js, Express.js, Jest

Tools & Platforms: Docker, Git, GitHub

Databases: PostgreSQL, MongoDB, MySQL, Redis, Google BigQuery

Design & Systems: Design Patterns, SOLID Principles, Microservices, Low Level Design, High Level Design

Concepts: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Systems

Achievements

- Silver Medalist** for academic excellence in B.Tech.
- Winner of intercollegiate coding contests: **Code Combat** and **Coding Chaos**.
- Codeforces Specialist** with a peak rating of 1453.
- Solved 1500+ problems across **LeetCode**, **Codeforces**, and **HackerRank**.

Education

Shri Guru Gobind Singhji Institute of Engineering and Technology

B.Tech in Information Technology

CGPA: 9.21 / 10

2020 – 2024

Nanded, Maharashtra
